

What's Happening in Algebra 1?

Welcome to Algebra 1!

I am so excited to begin working with your child this school year! During the month of September, we will be covering Chapter 1 and beginning Chapter 2. Chapter 1, Intro to Numbers, is a bit shorter, as it focuses on reviewing core concepts that students learned in middle school, that will be essential skills moving forward in Algebra. The tentative date for the Chapter 1 Test is 9/18. Students will then take an ungraded pre-assessment to help me best understand what their prior knowledge is. At the end of September, we will begin Chapter 2!

Upcoming:

- ☐ 9/5 - First Day of School!
- ☐ 9/6 - Signed syllabus due
- ☐ 9/11 - Supplies due
- ☐ 9/18 - Chapter 1 Test

Looking ahead:

Throughout this school year, you can anticipate receiving a monthly newsletter from me with any important information. Of course, there are always slight changes that occur due to special events, snow days, or students needing additional time to understand concepts. In that case, I will do my best to send Remind updates if important dates change throughout the month. I have found that when students know their teacher and guardians are on the same page and in frequent communication, they are more successful and are more likely to seek additional help when they need it. With that in mind, please do not hesitate to contact me if you ever have questions or concerns.
