

What's Happening in Algebra 2?

Welcome to Algebra 2X!

I am so excited to begin working with your child this school year! During the month of September, we will be covering Chapter 1 and beginning Chapter 4.

Chapter 1, is a bit shorter, as it focuses on reviewing core algebraic concepts. The tentative date for the Chapter 1 Test is 9/18. At the end of September, we will begin Chapter 4, Quadratic Functions!

What's the "x"?

This section of Algebra 2 meets daily, PLUS two extra times in the six day cycle.

This extra period is a time for us to reinforce skills and take extra time to review!

Upcoming:

- ☐ 9/5 - First Day of School!
- ☐ 9/6 - Signed syllabus due
- ☐ 9/11 - Supplies due
- ☐ 9/18 - Chapter 1 Test

Looking ahead:

Throughout this school year, you can anticipate receiving a monthly newsletter from me with any important information. Of course, there are always slight changes that occur due to special events, snow days, or students needing additional time to understand concepts. In that case, I will do my best to send Remind updates if important dates change throughout the month. I have found that when students know their teacher and guardians are on the same page and in frequent communication, they are more successful and are more likely to seek additional help when they need it. With that in mind, please do not hesitate to contact me if you ever have questions or concerns.
